

AGROGLORYTIME

**INVESTMENT PROPOSAL
FOR HIGH-LEVEL INVESTORS**

PROJECT DESCRIPTION

AgroGloryTime is a unique project that combines the rich traditions of Ukrainian agriculture with cutting-edge blockchain and artificial intelligence technologies. The company offers high-level investors the opportunity to invest in high-yield assets with real value, backed by an innovative ecosystem and ambitious growth plans.

“

This investment proposal is intended for strategic partnership with investors ready to commit \$1 million and above.

COMPANY'S PHYSICAL ASSETS: A RELIABLE FOUNDATION FOR INVESTMENT

LAND RESOURCES

AgroGloryTime owns over 2,000 hectares of fertile land in the Zakarpattia region of Ukraine, near the borders with Hungary and Romania.

This provides direct access to EU markets – one of the largest consumers of agricultural products in the world.

PRODUCTION FACILITIES

Current capacity — 1,000 tons of vegetables and mushrooms per year, with growth potential up to 4,000–12,000 tons by 2028, subject to investment in expansion.

CAPITALIZATION:

The estimated value of the company is \$50 million, with projected growth to \$200–350 million within 5–7 years through production scaling and technology implementation.

DEVELOPMENT PLANS:

Production increase by 4 to 12 times by 2028 through the construction of innovative greenhouse, mushroom, and aquaculture complexes.

“

These assets provide stability and minimize risks, making **AgroGloryTime** attractive to high-level investors seeking reliable investments with strong growth potential.

AGTI AND KNL: INNOVATIVE FINANCIAL INSTRUMENTS

AGTI

SECURITY:

The token is backed by the company's real assets (land, production), which reduces volatility and increases investor confidence.

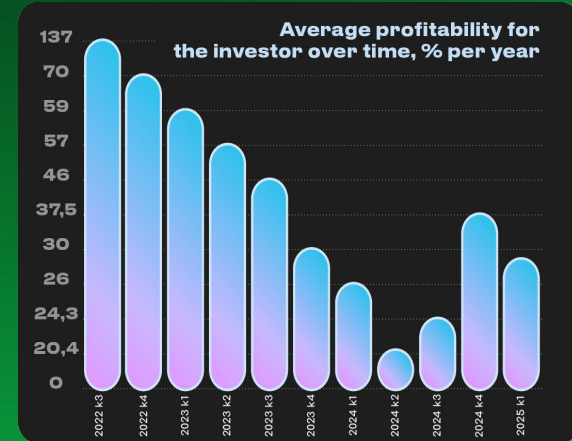

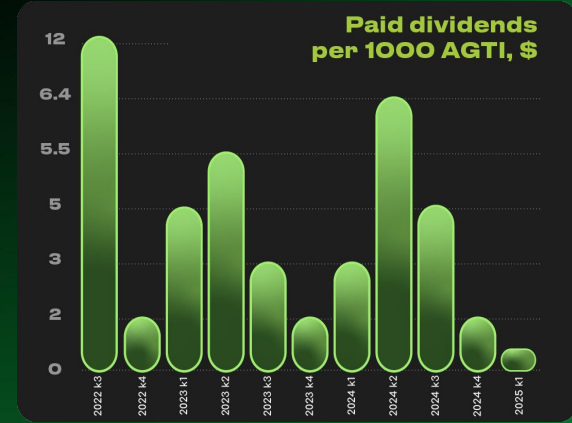

Profitability:

Over the past three years, the token has delivered stable returns of over 25% annually, paid quarterly in USDT.

BENEFITS FOR HIGH-LEVEL INVESTORS:

Holding 100,000 AGTI allows conversion into 0.01% of the company's shares; holding 1,000,000 AGTI enables exchange for 100 tons of products.

Emission: 1 billion tokens with gradual issuance until 2040, ensuring long-term inflation control. AGTI is the ecosystem's status token, symbolizing its "gold standard."

KNL

Functionality: Native token for games, the AGTInw network, and other AgroGloryTime applications.

Liquidity: KNL is always convertible into AGTI at a non-zero rate, with a 1:1 buyback option based on a smart contract algorithm.

Growth Potential: A significant increase in value is expected as the ecosystem develops.

AGTI and **KNL** tokens offer investors both stable income and speculative potential, making them a unique tool for portfolio diversification.

AGTINW INTELLIGENT NETWORK: A TECHNOLOGICAL REVOLUTION

DESCRIPTION

AGTInw is the world's first network combining blockchain and artificial intelligence to create a “global hyperbrain.” It solves complex problems, generates value through distributed computing, and empowers individuals to use **AGTInw** for everyday challenges.

CURRENT STATUS

The first “stem neuron” (**AGTI Stemneuron**) is currently in the testing phase, confirming steady progress in development.

PROSPECTS

The network has the potential to significantly boost token capitalization and open up new markets — including data, analytics, value generation, and solving unconventional problems.

For high-level investors, this is an opportunity to join the project at an early stage — one that may become a leader in intelligent technologies.

ECOSYSTEM: GAMES AND PROJECT TOKENIZATION

INCOME FOR AGTI HOLDERS

ACTIVE INCOME

Participation in referral programs and games (e.g., **KNOWARIUM**, **AGTI League**).

Passive income: Dividends from the agribusiness, paid quarterly.

INNOVATIVE PROJECTS

KNOWARIUM

An educational game with an intellectual theme that increases community engagement and token utility.

AGTI_{inw}

Network integration into the ecosystem to create synergy between technology and agribusiness.

TOKENIZATION GOALS

To increase the efficiency, transparency, and attractiveness of agriculture through blockchain, with the expected growth of **AGTI** and **KNL** token value as the ecosystem scales.

The ecosystem creates long-term value by attracting both investors and users, strengthening the project's position in the market.

INVESTMENT OPPORTUNITIES FOR HIGH-LEVEL INVESTORS

AgroGloryTime offers high-level investors exclusive programs with high returns and significant influence on the project's development.

CONSTRUCTION OF THE INNOVATIVE GREENHOUSE COMPLEX AGTI-4:

Investment: \$1–10 million

Ownership: 50/50 with **AgroGloryTime**

Profitability: 30–50% annually

Timeline: Partial launch — 1 year, full — 2 years

CONSTRUCTION OF THE MUSHROOM COMPLEX:

Investment: \$5–10 million

Ownership: 25–50%

Profitability: 30–50% annually

Timeline: Partial launch — 1 year, full — 3 years

**CONSTRUCTION OF THE FISH FARMING
COMPLEX (COHO SALMON, RED CAVIAR):**

Investment: \$1–10 million

Ownership: 50/50.

Profitability: 30–50% annually

Timeline: Partial launch — 2 years, full — 3 years

DEVELOPMENT OF THE AGTINW NETWORK:

Investment: \$1–10 million

Ownership: 3–30%.

Profitability: Potentially “fantastic” (hundreds of percent if successful)

Timeline: Partial launch — 2 years, full — 5 years

EXCLUSIVE BONUSES FOR HIGH-LEVEL INVESTORS

INFLUENCE

A high-ranking position in the DAO (decentralized governance) and the AGTI_{inw} network, providing voting rights in strategic decisions.

ADDITIONAL PRIVILEGES

Bonuses in AGTI and KNL tokens, increased dividends, and participation in project governance.

FLEXIBILITY

Willingness to consider individual proposals for investment and partnership.

WHY INVEST

STABILITY

Real assets and proven profitability of the **AGTI** token.

Potential increase in company capitalization by 4–12 times by 2028 ([based on the company's roadmap](#)).

Growth:

INNOVATION

Participation in revolutionary technologies (**AGTI****inw**, tokenization) that may shape the future of agriculture and AI.

Profitability: From 30% to 50% annually on physical projects, and potentially higher on tech ventures.

AgroGloryTime

is an opportunity for high-level investors to join a project that uniquely combines agricultural stability with technological breakthrough.
